SUPPORTING NATIONAL FEDERATIONS AND TOP ATHLETES

Since 1973, arena has prioritized strong connections with the most important swimming and watersports federations around the world, providing support from the grassroots level to the Olympics and Paralympics.

National Federations play a critical and active role in the development of both amateur and elite watersports.

We share their goal to grow watersports, increasing inclusivity and diversity and using sport as a driver for social wellbeing. We share their commitment to make the water accessible for people to relax, train and compete.

At the heart of the arena brand are its athletes, who are both key collaborators in the product development cycle and important ambassadors for the brand, upholding its values and expressing its authenticity.

Since Mark Spitz first teamed up with Horst Dassler in 1973, arena's progression to the top of its field has been accomplished in partnership with world class swimmers. Their voices are not only emblematic of the brand's emphasis on quality, they're also an inspiration for many, from the amateur who goes to the pool to stay fit and lead a healthy lifestyle, to those that mount the Olympic podium, and importantly also the backroom staff who have helped craft and live the entity that arena has proudly become.

Following the outstanding performance of its legendary team and its continued success in international competitions, arena continues to capture the world's attention and generate excitement and anticipation for the next wave of swimming events.

CSR MANIFESTO

BUILDING A BETTER FUTURE TOGETHER.

At arena we recognize that everything we do has an impact on the planet we live on, as well as its people.

We strive to help create a future that continues to allow everyone to enjoy swimming and water sports in a healthy environment.

That's why we're committed to having a positive impact on you, the environment and our communities, inspired by our passion for sports and life in and by the water, our most abundant natural element.

As a leader in the sports realm our commitment to 'responsibility' represents the conscious and effortful way in which we plan to measure our footprint and invest in our planet.

arena's products are designed to help and inspire people to be active and to move towards the best version of themselves by being healthier and connected to nature.

As part of that philosophy, quality and durability are key considerations in our design process in order to guarantee that our products are long-lasting and don't need to be replaced frequently, thus reducing waste.

We choose partners who share our values and, like us, invest in both the planet and its people.

We care about the well-being and rights of employees working in the manufacture of arena's products and are committed to being transparent about our partners and policies.

We support local communities and promote water-sports through sponsorship and collaboration with national sports federations, sports teams, and international governing bodies.

We are an equal-opportunity employer and value diversity ensuring equal treatment for all our employees across the globe.

The arena brand was born in water, and for over 50 years has thrived in its element.

We've learned that to do so requires courage, responsibility, and action, and we remain resolute in our desire to give everyone the opportunity of living their deep connection with water: that feeling of freedom and peace, joy and profundity we all experience in and by the water.

RESPONSIBLE PRODUCTS

To design and manufacture all products in a progressively more environmentally conscious way is a key step in the commitment we have taken.

We are constantly working to develop more sustainable garments and accessories to reduce our environmental impact, while still guaranteeing the same distinctive performance, quality, protec-

tion, style, comfort and fit that sets arena apart.

We are working with sustainable fabrics made with recycled fibers pre and post consumer, with organic fibers and certified according to third-part international certifications.

Starting from SS22, season by season, we have steadily increased the number of styles with responsible features, such:

- Recycled fibers: Commitment to use third-party certified materials such as the Global Recycled Stan-

dard for fabrics

- Organic cotton: Cotton grown using agricultural methods that do not use synthetic pesticides, chemical fertilizers, or other harmful chemicals.

- OEKO-TEX Made in Green certification: The certification focuses on product safety and sustainable manufacturing processes.

We proudly accept the challenge of ensuring excellent product performance while pursuing environmental and social sustainability.

ARENA DESIGN PILLARS

HIGH PERFORMANCE

Maximum comfort and performance are priorities in our swimwear. Our innovative materials and streamlined, athletic cuts focus on ease of movement and comfort for all body types, whether you are swimming laps or enjoying leisurely dips in the ocean.

DURABILITY

Durable, multi-use products reduce environmental harm over long life cycles. We select high-quality, long-lasting materials and components so your swimsuit and other products withstand many seasons of swimming.

LOW ENVIRONMENTAL IMPACT

Choosing eco-friendly materials, and cutting waste and pollution, are vital for dealing with the environmental challenges of our time. Circular models are essential to our brand mission, with optimized production processes to minimise waste and environmental harm.

RESPONSIBLE SUPPLY CHAINS

Responsible, ethical supply chains that positively impact and inspire communities and protect resources for future generations through fair, sustainable practices for each individual product made.

RESPONSIBLE PACKAGING

All the elements necessary in the delivery of products to the consumer have an impact on the environment. To reduce this impact, we are using sustainable materials for our packaging (hangtags, pouches, polybags, boxes, etc.). FSC certified cardboard is our choice for most packaging made of paper. For the majority of caps that come in plastic packaging, we use recycled plastics.

The FSC logo on our packaging ensures that it has been made in compliance with rigorous environmental, social and economic standards, which aim to protect the world's forests and ecosys-

tems that depend on them and respect local communities and the rights of workers.

This choice supports the mission of the Forest Stewardship Council®, an international NGO that has been promoting responsible forest management for over 25 years.

Following the approach taken in FW25 for swimwear pool and sportswear, starting from SS26, racing hangtags have also been reduced in size and simplified by consolidating two hangtags into one. This adjustment has led to significant raw material savings.

The mark of
responsible forestry

FABRIC WEIGHT

> HYPERFORCE (< THE TENSOELASTIC FABRIC

Thanks to the revolutionary tensoelastic properties of the arena Hyperforce™ fabric, Powerskin Primo redefines compression by maximizing it with just minimal stretching. Fabric's extraordinary elasticity allows for 50% more stretch than standard fabrics, enabling a range of motion never experienced before. It delivers the highest overall compression and ultimate comfort.

>> CARBON FIBER

10 times stronger than steel, chlorine resistant and with shape-memory, Carbon Fiber is a powerful material with extraordinary qualities. Tech suits made from this fabric are highly resilient and are not altered by use in pool water for a long-lasting lifespan.

POWERSKIN PRIMO

THE FIRST RACING SUIT WITH HYPERFORCE™ FABRIC.

Engineered with
>)HYPERFORCE(<
 THE TENSOELASTIC FABRIC

The genesis of a new era: 4 years of development, 18 months of tests, 89 different prototypes and almost 400 athletes involved around the world. arena redefines the world of swimming and introduces the pinnacle in technical racing suit technology: POWERSKIN Primo, built from the ground-up utilizing the latest scientific breakthroughs in the textile industry and physics for unparalleled performance and durability. Designed to eliminate all compromise in your technical racing suit selection, it is not just a compressive suit. It's the first of its kind.

POWERSKIN PRIMO

FIRST IS BETTER THAN FAST.

Engineered with
>)HYPERFORCE(<
 THE TENSOELASTIC FABRIC

COMPRESSION and FLEXIBILITY

No more compromise. Our most powerful compression combined with extraordinary elasticity thanks to Hyperforce™ - the first ever Tensioelastic fabric.

QUICKER RACE-DAY ROUTINE

Fast in AND out of the water. Finally a high-compression suit that goes on in under 5 minutes to streamline your race-day routine.

FLOATING LEGS

A completely new internal taping construction provides powerful support that lifts the legs and hips for optimal body positioning.

PERMANENT WATER RESISTANCE

Permanently hydrophobic TPU fiber provides for maximum water repellency over the life of the suit.

EXPANDED SIZE RANGE

Available in Long Torso sizes for a near-custom fit and supreme comfort without sacrificing compression.

NEW SHOULDER STRAP DESIGN

Redesigned shoulder strap construction provides more stability and fewer pressure points for optimal comfort and range of motion.

CORE SUPPORT

Internal X-Tape construction provides excellent core stability and connects the hips to the upper body to limit excessive torso rotation.

SUPERIOR WATER FLOW

Hyperforce's unique flow-channeling fabric surface improves hydrodynamics and lowers surface drag for maximum speed and streamline performance on and under water.

CUSTOM WAIST HEIGHT

The Hyperforce fabric's extraordinary elasticity allows for custom waist height adjustment from low to high.

ENHANCED COVERAGE

Longer cut from waist to knee provides greater suit coverage for maximum compression where you need it most.

WORLD AQUATICS

APPROVED

POWERSKIN VELOCE

PURE SPEED. TRUE COMFORT.

Engineered with

>HYPERFORCE(<
 THE TENSOELASTIC FABRIC

Powerskin Veloce is the new racing suit designed to deliver elite-level performance with uncompromised comfort.

Engineered with cutting-edge Hyperforce™ technology, it provides powerful compression without restrictions, delivering optimal muscle support, hydrodynamics, and unmatched comfort. Every detail is designed to help swimmers focus purely on speed and feel the difference that true comfort makes.

POWERSKIN AIR 3

THE SPEED OF LIGHT.

Engineered with

 **CARBON FIBER**

Fast has a new Feel. Introducing the newest member to the most popular elite racing suit family in arena history: Powerskin Air 3.

Born from the same iconic Carbon shell fabric that athletes have trusted for over a decade, Air 3 evolves the platform with multiple game-changing upgrades previously reserved for arena's highest-tier elite suits.

Featuring the same comfortable race-ready compression, ultra-lightweight second-skin feel, and unmatched comfort and flexibility, Air 3 delivers a modern upgrade that preserves everything swimmers love about the Air family.

Same iconic feel, same legendary performance, now with elite construction that lifts, aligns, and streamlines.

Powerskin Air 3. The Speed of Light.

POWERSKIN AIR 3

THE SPEED OF LIGHT.

Engineered with
 **CARBON FIBER**

FLEXIBILITY COMPRESSION

ULTRALIGHT FABRIC

The lightest suit in the Powerskin range, offering maximum flexibility and water feel.

FLEXMAX SHOULDER STRAPS

A newly engineered shoulder strap that conforms to the body with adaptive flexibility, maximizing comfort and freedom in every motion.

LEG LIFT EFFECT

Developed from Primo and Veloce taping to help maintain a higher body position in the water.

MAXIMUM COMFORT

Engineered for supreme mobility.

COMFORTABLE COMPRESSION

Horizontal carbon bands lock down at critical stretch to provide moderate compression, stability, and power when and where it's needed.

EXPANDED SIZE RANGE

Available in Long-Torso sizes for a near custom fit and supreme comfort without sacrificing compression.

ENHANCED COVERAGE

Extended length from waist to knee for increase leg coverage, better compression, and superior hydrodynamics.

CARBON SHELL FABRIC

The internal tape construction provides excellent core stability delivering a secure and supportive fit.

PREMIUM INTERNAL LINING

Optimized hydrodynamics and lasting performance.

POWERSKIN IMPULSO

PRO-LEVEL TECHNOLOGY NOW ACCESSIBLE TO ALL SWIMMERS.

Stripped down to the essentials, Powerskin Impulso focuses solely on what matters: it's crafted from high-quality Italian woven fabric, born in the same fabric mill as Primo, offering moderate compression to enhance muscle support and reduce drag in water. Durable and lightweight, it features strategically

placed flatlock seams for optimal movement and comfort. Suitable for both adults and juniors, it is World Aquatics approved and is priced competitively, making it an ideal choice for competitive swimmers seeking performance and value.

POWERSKIN ST NEXT

THE FIRST EVER FINA-APPROVED RACING SUIT MADE WITH RECYCLED FIBERS.

arena proudly introduces the next generation of competitive swimsuit. The first brand worldwide to ever launch a sustainable racing suit: the ST NEXT. Compared to the previous ST 2.0, this re-envisioned version is 20% lighter, which results in less water absorption and drag. The specific characteristics of the new fabric provide a longer-lasting compression

and, consequently, greater durability. In addition to its performance, ST NEXT utilizes sustainable materials. Over 60% of the yarns used in its fabrication come from pre and post-consumer waste, which would have otherwise been destined for landfills. The FINA approved status of the ST NEXT makes it the first of its kind to be suitable for competitions.

POWERSKIN IMPULSO

HOW TO TAKE MEASUREMENTS (VALID FOR ALL POWERSKIN RACING SECTION)

- A • Chest:** Take the measurement over the fullest part of your bust.

B • Waist: Measure around the narrowest part of your waistline.
- C • Hips:** Measure around the fullest part of your hips.

D • Torso loop: In a loop, measure from the highest part of the shoulder, beneath the crotch and then back to the starting point.

(**) Body measurements and corresponding sizes are to be considered as a general guideline. We strongly recommend that any racing suit should be tried on by each swimmer before choosing the appropriate size, based upon individual preference in terms of compression. Swimming stroke and distance may also be key factors in the suit selection.

OPEN WATER WETSUIT

POWERSKIN STORM

THE WETSUIT OF CHAMPIONS.

APPROVED

for every triathlon and swimming race

1,5mm of stretchy Yamamoto neoprene across the shoulders and arms provide **MAXIMUM FREEDOM OF MOVEMENT**

arena's exclusive combination of 4mm three-layered Yamamoto neoprene features Airlock on the core and upper thigh areas for **SUPERIOR BUOYANCY**

Strategic distribution of #39 and #40 Yamamoto neoprene thickness for an **OPTIMAL BODY POSITION**

Nano SCS coating for **REDUCED DRAG AND AN OPTIMAL GLIDE** through the water

LOW PROFILE NECKLINE for maximum comfort and no chaffing

Standard **BOTTOM-UP ZIPPER** for ease of use

2mm forearm double laminated panel for **HEIGHTENED WATER FEEL** during the catch and pull phase of the stroke

Enhanced elasticity on ankles and wrist cuffs for **FASTER EXITS AND TRANSITIONS**

THE NEW POWERSKIN STORM WAS DESIGNED FOR ATHLETES BY ATHLETES WHO WERE LOOKING FOR MAXIMUM BUOYANCY WITHOUT COMPROMISE ON FLEXIBILITY, COMFORT AND INSULATION.

An evolution of our popular Carbon Wetsuit (the most decorated wetsuit of the modern era of the Open Water

Swimming), the all improved **POWERSKIN STORM** is constructed from 100% Yamamoto SCS glide neoprene. The 4mm (laminated Airlock) density at the core, legs and buttocks and 3mm thickness at the chest and calves allows for improved core support, body hold and stabilised insulation, whilst the 1,5mm thickness at the arms and shoulders provides ultimate flexibility, comfort and freedom of movement.

POWERSKIN THUNDER

THE ESSENCE OF WETSUITS.

LOW-PROFILE NECKLINE

prevents chaffing for added comfort

Thick 4mm #38 Yamamoto limestone neoprene on the core allows for **MAXIMUM BUOYANCY**

#38 Yamamoto limestone neoprene on the legs is 3 mm thick for an ideal **COMBINATION OF FLEXIBILITY AND BUOYANCY**

IMPROVED ZIPPER CLOSURE provides a secure seal

Standard **BOTTOM-UP ZIPPER**

2 mm thin #38 Yamamoto limestone neoprene covers the arms for **GREATER FLEXIBILITY**

MEET THE WETSUIT THAT IS FITTED WITH CORE TECHNOLOGIES TO PROVIDE THE BEST MIX OF BUOYANCY, FLEXIBILITY, THERMAL PROTECTION AND COMFORT.

The POWERSKIN THUNDER was conceived in an effort to understand the essence of what open water swimming beginners need from a wetsuit. We utilized our proven legacy and experience in the sport to provide novices with a clear-cut solution to their racing needs. Equipped with all

the essentials, it is made entirely from eco-friendly, durable Yamamoto limestone neoprene and coated with Nano SCS for an efficient glide through the water. The distribution of neoprene density minimizes resistance during the swimmer's stroke, and provides buoyancy in all the right areas for an optimal body position. The thickest 4mm layer is placed within the core for added stability, while the upper chest and legs are supported with a lighter layer of 3mm neoprene for thermal protection. The shoulders and arms experience greater freedom of movement thanks to the 2mm neoprene thickness coverage.

EQUIPMENT

COBRA GOGGLES FEATURES

BEST TECHNOLOGY. HIGHEST PERFORMANCE.

Cobra goggles are the most advanced performance goggles for competitive swimmers on the market.

COBRA
family

COBRA GOGGLES

COMPETITIVE

Designed for competitive swimmers and approved by WORLD AQUATICS, arena Racing goggles combine innovative materials and a hydrodynamic profile that reduces drag and enhances vision, while delivering comfort and durability.

The family is now enriched by the new Cobra Edge: superior hydrodynamic design, unprecedented side and upward vision, increased eyelash space and improved nose bridge and gasket fit for a better comfort: the state-of-the-art goggle, equipped with Cobra family's unparalleled anti-fog technology: Swipe.

Also in the family: Cobra Ultra, with its sleek hydrodynamic construction and Cobra Core, mostly known for their comfort, both share frame-integrated lenses, reducing drag to the extreme.

At the same time, both Cobra Ultra and Cobra Original present an ingenious extended frame for extra stability when on. Besides, Cobra goggles are enviously cool: their aggressive look gives swimmers an edge over their rivals.

006870 - COBRA EDGE SWIPE MIRROR

Unprecedented mix of technology, fit and visibility for the ultimate arena racing goggles; fitted with Swipe anti-fog technology. Features mirrored lenses.
